

# Network your business Private Leased Line

Private Leased Line delivers a highly scalable and resilient point-to-point or point-to-multipoint private leased switched circuit, providing high speed connectivity across Africa, Europe and the rest of the world.

## Benefits:

Private Leased Line utilises our own fibre builds and strategic investments in most of the African cable consortium on private submarine cable systems. This enables Liquid Telecom to offer you a full end-to-end solution with a single SLA guarantee.

- **Secure links between offices,** Private Line provides you with the ability to control and manage your own network routing, protocols and security. Delivered using Synchronous Digital Hierarchy (SDH) infrastructure, IPLs can be configured to enable fault tolerance and service restoration, to improve service availability in abnormal situations
- **International connectivity,** as a leading global supplier of managed network services, Liquid Telecom has an established presence throughout Africa and Europe
- **Reliable service,** IPL is built using resilient SDH technology, with the ability to re-route traffic via a redundant path in the event of a core network fault. For companies requiring a high-availability service, configurations for protected IPL Services are designed to permit automatic recovery from a major Terrestrial or sub-sea cable failure in fewer than 50 milliseconds. This is supported with our Service Level Agreement covering service delivery, service availability and mean time to restore
- **Predictable performance,** select from IPLs with a range of different bandwidths to precisely match the capacity that you need to meet your current and anticipated network requirements. In addition, protocol transparency ensures you have the ability to prioritise traffic to your specific business requirements and experience predictable performance across all applications utilising the service

## Support

Keeping your business connected at all times is of utmost importance to us, which is why Liquid Telecom provides inclusive 24/7 support for your connectivity needs.

## Liquid Telecom, your digital transformation partner

We believe in the ambition and potential of the African business. That is why we combine our expansive reach, reliable, high-speed connectivity, state-of-the-art data centres and innovative digital solutions to augment your digital experience. Because we are not just a telecoms company. We are your digital transformation partner.
